

Educational Excellence Everywhere

www.welearn.in

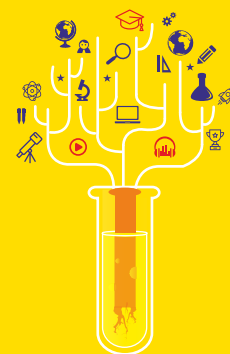

Audio-visual technology

has taken centre-stage in the education sector.

Our children come into the world curious, wired for enthusiasm, adventurous and open-minded.

WeLearn™ had analysed and Implemented A Revolutionary, Individualized Learning Software with Animated Visualization, Audio, Images, Graphics and other Illustrative Techniques to learn effectively and efficiently for Students from Grade 6 to Grade 12 - CBSE Syllabus.

WeLearn™ Empowers them to Acquire the Skills to meet the Challenges like Medical / Engg. Entrance, NEET, IIT-JEE etc., and ensure all Students are Successful.

Importance of Visualized Learning

Never underestimate the power of Visualisation. "Statistics of Mental Imagery" says 80% of what we see, will be able to register in our Mind and Recollect. Whereas we can remember only 20% of what we READ and 10% of what we HEAR.

WeLearn™ is available for the students from Grade 6 to 12, CBSE syllabus. Subject-wise, Chapter-wise & topic-wise audio-visual classes are available for each grade Students separately.

Present Class Room Learning Experience

The Teacher's role is to honour and nurture children while drawing out the innate gifts in them. Teachers 'go the extra mile' for Students, providing extra assistance to ensure that Students Succeed in Learning. But this may not be possible all the time to give Individual attention to all the Students.

Here, WeLearn™ is committed to providing a unique educational experience that gives students, views of the world's learning space towards Graduation of Students through Visualized Learning, beyond Normal Classroom. Thus, helping the Teaching Staffs to reduce their Burden Considerably.
